article attached

Feb 14, 2005

The Louisville Metro Air Pollution Control Board

We, the Members of the Libertarian Party and Stop the Vet would like to see the issue of Reformulated Gas added to the Strategic Toxic Air Reduction (Star) program. It is our desire to see RFG no longer mandated in the METRO Area

We Believe there is ample evidence that RFG is harmful to the environment increases ozone levels, expensive to produce, not energy efficient, costlier to consumers and harmful to older models of cars

As our community goes forward with an action plan to help us improve air quality, thus making our air cleaner + safer for all, we believe ending the mandate for RFG would greatly benefit the plan + our community
