

**Louisville Metro Air Pollution Control District
Preliminary
Regulatory Impact Assessment**

**Regulation 5.01
General Provisions
Version 7/External**

Purpose of the Draft Proposed Action:

The purpose of the draft proposed action is to consolidate definitions relating to the STAR Program, currently in Regulations 1.02, 5.01, and 5.21, into one new regulation, Regulation 5.00, *Definitions*. In addition, Section 2, "Applicability," has been deleted as redundant with the General Duty clause in the following section, and with the applicability provisions of Regulation 5.21.

Estimated Costs and Savings:

There are no costs associated with the draft proposed action.

Feasibility of All Alternatives:

The District evaluated leaving the definitions related to STAR in separate regulations, but determined that consolidating them in a single regulation would be more useful and make the STAR Program easier to read.

Comparison with Any Minimum or Uniform Standards:

There are no minimum or uniform standards governing the District's STAR program.

Report on Public Outreach Efforts:

This draft proposed Regulation 5.01 is part of a package of amendments to STAR regulations that was proposed for informal external review on March 17, 2010, and sent to: to all members of the 2009 STAR Advisory Group; all persons who have requested to be informed of proposed changes to STAR regulations; all persons who have requested to be notified of proposed changes to any District regulations; EPA Region 4; and the Kentucky Division for Air Quality. The District received written informal comments on the draft proposal and is responding to those comments in a separate Comment/Response document. The public will have an opportunity to comment at a meeting of the appropriate committee of the Air Pollution Control Board, during the formal public comment period, and at a public hearing prior to consideration by the full Board.
