

3.5 PLAN MAINTENANCE PROCEDURES

This Plan Maintenance Procedures describes the method and schedule of monitoring, evaluating, and updating the Mitigation Plan within a five-year cycle. When updated, the plan will be reviewed and revised, if appropriate, and resubmitted to the State Hazard Mitigation Officer for initial review and coordination or within five years of the plan or the plan's update approval by FEMA Region IV. As appropriate, the plan also will be evaluated after a disaster, or after unexpected changes in land use or demographics in or near hazard areas. The Advisory Committee also will be kept apprised of a change in federal regulations, programs and policies, such as a change in the allocation of HMGP or PDM dollars. These evaluations will be addressed in the annual progress report for the plan and may effect the Action Plan.
