

STAR Advisory Group Stakeholder Preparation for March 20, 2009 Meeting

The advanced notice of proposed rulemaking (ANPR) raised the question, should operational flexibility be built into STAR permitting requirements?

The District is requesting information from regulated entities on how to incorporate operational flexibility into STAR permitting. Specifically, what types of actions would fit into the following categories:

1. Actions that would not require District notification
2. Actions that would require District notification
3. Actions that would require District notification and approval

Please be prepared to discuss these specific questions at the March 20, 2009 meeting of the STAR Advisory Group.
