

Michael Purcell, Weatherization Program Rehab Specialist, has worked in the residential construction and rehabilitation field since 1988. He ran crews for Louisville's Project Warm for three years, and began with Metro government in 1992 as Weatherization Program inspector and temporary program coordinator. Michael has received training or certifications in a wide variety of weatherization-related areas: heating systems inspection, maintenance and repair; blower door utilization and pressure diagnostics; asbestos awareness; gas code compliance; mold training; and numerous training programs for lead safe work practices. He is also certified to perform Energy Star Ratings on new homes.
