

Idling Reduction Working Group
Stakeholder Preparation for May 2008 Meeting

IRWG members should review the **SCOPE** section of the Idling Restriction Review and be prepared to discuss these issues.

The following questions should be answered at the May 2008 meeting:

- What types of engines and/or vehicles should be covered by the idling reduction regulation?
- Which categories of mobile sources should be covered by the idling reduction regulation?
- What should be the idling time limit?
